Education

De La Salle University

Manila, Philippines

Bachelor of Science in Computer Science, Major in Software Technology

Expected October 2026

Minor in Data Science

Relevant Coursework: Data Structures and Algorithms, Advanced Software Engineering, Advanced Database Systems, Computer Networks, Operating Systems, Secure Web Development

Xavier University – Ateneo de Cagayan

Cagayan de Oro, Philippines

Senior High School, Science, Technology, Engineering, and Mathematics Strand

June 2019 – June 2021

Xavier University – Ateneo de Cagayan

Cagayan de Oro, Philippines

Junior High School

June 2016 – June 2019

Experience

Tensei Philippines Inc.

Manila, Philippines

Software Developer Intern, Full-Stack

March 2025 – June 2025

- Refactored a 2,000-line inventory application into a modular, component-based architecture, reducing average file size to approximately 400 lines.
- Developed full-stack features for an internal DevOps inventory system using Laravel and Vue 3, designed with modularity to support future client deployments.
- Produced interactive Figma prototypes for the inventory system and additional internal projects.
- Collaborated with a three-person intern team on planning, code review, and iterative delivery.

Dr. Tayste Bud Corporation

Quezon City, Philippines

Information Technology and Administrative Officer, Part-Time

June 2021 – Present

- Administered point-of-sale systems, corporate email, and payment workflows across a 10-employee restaurant operation as the sole technical point of contact.
- Led migration of the cheque issuance process from manual handwriting to an automated printed system, reducing processing time and eliminating transcription errors.
- Initiated an ongoing rollout of an updated point-of-sale platform to smaller branch locations, coordinating setup, staff training, and data migration.
- Handled administrative operations including internal documentation, vendor coordination, and cross-department communication.

Projects

Canvas Discord Bot

2026

Python, Discord.py, Canvas Learning Management System API, Advanced Python Scheduler

- Engineered an automated pipeline synchronising Canvas announcements and assignment deadlines to a designated Discord channel via asynchronous task scheduling, message deduplication, and structured logging.

Basket Grocery Tracker

2026

React, TypeScript, Vite, Supabase, Vercel

- Designed and built a full-stack grocery tracker with a TypeScript React frontend and a Supabase serverless backend for authentication and data storage, deployed with continuous integration on Vercel.

github.com/mike-jgo/basket

Fitlog Workout Tracker

2025

React, Vite, Supabase, Tailwind CSS, Recharts

- Developed a web application supporting user authentication, workout logging, and Recharts progress visualisations, architected around reusable React components and deployed to GitHub Pages.

github.com/mike-jgo/gym-app

Inventory Management System

2025

Laravel, Vue 3, Inertia.js, MySQL

- Built a full-stack inventory management system enabling item creation, editing, and stock level tracking through a reactive single-page interface, using Inertia.js to bridge Laravel and Vue 3.

Metro Manila Weather Prediction Analysis

2024

Python, Selenium, Pandas, NumPy, Scikit-learn

- Scraped and cleaned multi-year historical Metro Manila weather data using Selenium and Pandas, then applied supervised learning algorithms from Scikit-learn to forecast weather patterns.

Cold Storage Facility Showcase Website

2023

Node.js, Express.js, Mocha

- Served as back-end developer and quality assurance, building Express.js content management endpoints and Mocha test suites for an administrator-editable content system requiring no developer involvement for updates.

Leadership & Activities

ASEAN Data Science Enablement Session

Manila, Philippines

Participant

May 2023

- Completed an ASEAN-led workshop on SAP Cloud applications for dataset analysis, engaging with regional peers on practical data science tooling.

Xavier University Student Government, Department of Communications

Cagayan de Oro, Philippines

Member

2019 – 2020

- Designed infographics and produced documentation supporting school-wide communications and student outreach.

Media Information Technoculture Club

Cagayan de Oro, Philippines

President

2018 – 2019

- Organised technology events and workshops promoting digital literacy and engagement with technology among peers.

Skills & Interests

Technical: Python, Java, JavaScript, React, Vue 3, Tailwind CSS, Vite, Inertia.js; Node.js, Express.js, Laravel, Supabase; MySQL, MongoDB; Pandas, NumPy, Scikit-learn, TensorFlow; Git, Selenium, Cypress, Mocha

Design: Figma; User Interface and User Experience Design

Methodologies: Agile, Scrum

Language: English (fluent), Bisaya (fluent), Filipino (conversational)

Interests: Software development, fitness technology, data science applications
