SKILLS

Languages

Python, Java, JavaScript, TypeScript

Front-End

React, Vue 3, Tailwind CSS, Vite

Back-End

Node.js, Express.js, Laravel, Supabase

Databases

MongoDB, MySQL

Data Science

Pandas, NumPy, Scikit-learn, TensorFlow

Testing / QA

Cypress, Mocha

Tools

Git, Selenium, Discord.py, REST APIs

Other

Agile/Scrum, UI/UX Design

ACTIVITIES

ASEAN Data Science Enablement Session

May 2023

Participated in an ASEAN-led workshop on SAP Cloud for dataset analysis.

Dept. of Communications, XU Student Government

Member · 2019 – 2020

Created infographics and documentation for school communications.

Media Information Technoculture Club

President · 2018 – 2019

Organized tech events and workshops to promote technology among youth.

SUMMARY

Final-year Computer Science student at De La Salle University, majoring in Software Technology and minoring in Data Science. I build full-stack web applications and data-driven pipelines using React, Vue 3, Node.js, Python, and cloud-integrated backends. Comfortable in Agile/Scrum environments and experienced shipping independent end-to-end projects.

EDUCATION

De La Salle University — Taft Campus

2021 – Present

BS Computer Science · Major in Software Technology · Minor in Data Science

Xavier University Ateneo de Cagayan

Senior High School · 2019 – 2021

STEM Strand

Xavier University Ateneo de Cagayan

Junior High School · 2016 – 2019

EXPERIENCE

IT / Administrative Officer

Dr. Tayste Bud Corporation · 2021 – Present · Part-time

- Managed IT infrastructure and provided technical support across the organization.
- Handled administrative operations including documentation and internal coordination.

PROJECTS

Canvas Discord Bot · 2026

Python · Discord.py · Canvas API · APScheduler

- Automated Canvas LMS announcement and deadline syncing to a Discord server channel.
- Async task scheduling, message deduplication, and structured logging.

Basket Grocery Tracker · 2026

React · TypeScript · Vite · Google Apps Script

- Full-stack grocery tracker with a TypeScript React frontend and serverless backend.
- Backed by Supabase for user auth and data storage; deployed to Vercel with CI/CD.

github.com/mike-jgo/basket

Fitlog Workout Tracker PWA · 2025

React · Vite · Supabase · Tailwind CSS · Recharts

- Full-stack PWA with user authentication, workout logging, and Recharts visualizations.
- Deployed to GitHub Pages; built with reusable React components and a Supabase backend.

github.com/mike-jgo/gym-app

PROJECTS

Inventory System · 2025

Laravel · Vue 3 · Inertia.js · MySQL

- Full-stack inventory management system built with Laravel and Vue.js.
- Allows users to manage inventory items and track stock levels.

Cold Storage Facility Showcase Website · 2023

Node.js · Express.js · Mocha

- Back-end developer and QA: built content management endpoints with Express.js.
- Designed an admin-editable system requiring no developer involvement to update.

Weather Prediction Dataset & Analysis · 2024

Python · Selenium · Pandas · NumPy · Scikit-learn

- Scraped and cleaned historical Metro Manila weather data via Selenium WebDriver.
- Applied ML algorithms to forecast weather patterns; exported as structured CSV.
